

LOGO USAGE GUIDE

Gender Justice League Action

Logo Standards for Web, Print, and Digital Applications

Version 1.1 · March 2026

Supplement to the GJLA Brand & Style Guide

For use by designers, partners, staff, and AI assistants

**Gender Justice
League Action**

DIGNITY. RIGHTS. POWER.

SECTION 1

Primary Logo

The official GJLA logomark and lockup configurations.

The Double Chevron Shield

The GJLA logo is a navy shield with a gold perimeter border containing two forward-facing chevrons — the leading chevron at reduced opacity, the trailing chevron at full weight. The mark communicates protection, forward momentum, and the arc of movement-building: emergence into decisive action.

Primary lockup: logomark + stacked wordmark with tagline. This is the preferred configuration for most applications.

Logo Elements

Shield

Navy (#1B2A4A) fill with gold (#E8A020) perimeter stroke. Represents protection, authority, and institutional strength.

Double Chevron

Two forward-facing chevrons in gold. The leading chevron is at 50% opacity; the solid chevron follows. Together they represent emergence into action.

Wordmark

Set in Georgia, bold. "Gender Justice" on line one, "League Action" on line two. Tagline "Dignity. Rights. Power." in Calibri, bold, uppercase, gold, letter-spacing 3px.

SECTION 2

Logo Variations

Approved configurations for different contexts and applications.

Four Approved Lockups

The GJLA logo is available in four configurations. Use the version most appropriate for the context, space constraints, and surrounding content.

A. Full Lockup

Shield + stacked wordmark + tagline. The primary configuration. Use for formal, public-facing materials, external communications, and all branded applications.

B. Simple Lockup

Shield + stacked wordmark + tagline, without additional descriptive text. Use for internal documents, slide headers, social media banners, and compact branded contexts.

C. Horizontal Lockup

Shield + single-line wordmark. Use in navigation bars, email signatures, and tight horizontal spaces. Minimum width: 240px / 2.5 inches.

D. Logomark Only

Shield without wordmark. Use as favicons, app icons, social media avatars, and watermarks. The full organization name must

appear elsewhere on the page or screen.

SECTION 3

Color Versions

Approved color treatments for different background contexts.

Primary Color Versions

The logo has two primary color versions. Use the version that provides the strongest contrast against the background.

On White / Light Backgrounds

Navy shield, gold accents, navy text. Use on white (#FFFFFF) or off-white (#F5F4F0) backgrounds.

On Navy / Dark Backgrounds

White shield, gold accents, white text. Use on navy (#1B2A4A) or dark backgrounds.

Transparent Backgrounds

Transparent-background versions are available for overlaying on photographs, gradients, or colored fields. Ensure sufficient contrast between the logo and the underlying content — a minimum contrast ratio of 4.5:1 for the shield against the background.

Navy shield on transparent

White shield on transparent

Color Reference

ELEMENT	HEX	RGB	USAGE
Navy	#1B2A4A	27, 42, 74	Shield fill (light bg), wordmark text (light bg)
Gold	#E8A020	232, 160, 32	Shield border, chevrons, tagline text
White	#FFFFFF	255, 255, 255	Shield fill (dark bg), wordmark text (dark bg)

IMPORTANT: Never alter the logo colors. The navy/gold/white palette is the only approved color treatment. No grayscale, no single-color, no tinted versions.

Clear Space & Minimum Size

Protecting the logo's visual integrity across all applications.

Clear Space

The clear space around the logo ensures it is never crowded by other visual elements. The minimum clear space is defined as the height of the chevron element (labeled "X" below). This space must be maintained on all four sides of the logo in every application.

Minimum Size

To preserve legibility and the integrity of the chevron detail, the logo must not be reproduced below the following minimum dimensions.

FORMAT	LOGOMARK ONLY	LOCKUP (ICON + TEXT)
Digital (screen)	24 × 24 px	160 px wide
Print (CMYK)	0.25" × 0.25"	1.5" wide
Favicon / App Icon	16 × 16 px (simplified)	N/A — use icon only

Do's and Don'ts

Protecting the logo's integrity in all contexts.

✓ Do

Use only the approved color versions (navy/gold on light, white/gold on dark). Maintain the minimum clear space around the logo at all times. Use the SVG or vector file formats whenever possible for maximum quality. Reproduce the logo at or above the minimum size specifications. Use the appropriate lockup configuration for the context.

✗ Don't

Don't alter the logo colors, including converting to grayscale or applying tints. Don't rotate, skew, stretch, or distort the logo in any way. Don't add drop shadows, outlines, glows, or other effects. Don't place the logo on busy photographs or low-contrast backgrounds without sufficient separation. Don't rearrange the relationship between the shield and the wordmark. Don't animate or modify the chevron elements.

Common Misuses

No Distortion

Never stretch, compress, rotate, or skew the logomark. The shield proportions are fixed.

No Color Alteration

Never change the navy, gold, or white to other colors. No grayscale versions. No single-color treatments.

No Effects

Never add drop shadows, bevels, embossing, gradients, glows, or other visual effects to the logo.

No Background Conflict

Never place the navy version on dark backgrounds or the white version on light backgrounds. Ensure

No Crowding

Never allow other elements — text, images, borders, or graphics — to enter the minimum clear space zone.

No Combination Logos

Never combine the GJLA logo with the GJL logo into a single blended mark. Per the Brand & Style Guide, the two entities must

contrast.

remain visually distinct.

SECTION 6

Web & Digital Usage

Specifications for screens, email, social media, and digital platforms.

File Formats for Web

CONTEXT	FORMAT	RECOMMENDED SIZE	NOTES
Website header / nav	SVG	Height: 32–48px	Use horizontal or simple lockup; SVG scales perfectly on retina
Favicon	ICO / PNG	16×16, 32×32, 180×180	Icon only; include multiple sizes for browser and device compatibility
Social media avatar	PNG	400×400 px	Icon only; use circular crop with navy background and gold border
Social media banner	PNG	1500×500 px (Twitter/X) 1584×396 px (LinkedIn)	Simple or full lockup; place in left third of banner
Email header	PNG	200–300 px wide	Simple lockup on navy background strip; export at 2× for retina
Email signature	PNG	160 px wide	Horizontal lockup; export at 2× for retina (320px actual)
Open Graph image	PNG	1200×630 px	Full lockup centered; navy background recommended

CSS Implementation

When embedding the logo on a website, use the SVG format inline or as an image source. This ensures crisp rendering at any resolution, including retina and high-DPI displays.

```
/* Recommended CSS for logo container */
.gjla-logo {
  height: 40px; /* Adjust to context */
  width: auto;
```

```
display: block;
}

/* Retina-ready PNG fallback */
.gjla-logo-png {
width: 160px;
height: auto;
image-rendering: -webkit-optimize-contrast;
}
```

Accessibility

All logo images must include descriptive alt text for screen readers. The recommended alt text is:

```
alt="Gender Justice League Action logo – a navy shield with gold
double chevron and gold border"
```

When the logo is used as a link (e.g., to the homepage), the alt text should describe the destination rather than the image:

```
alt="Gender Justice League Action – Return to homepage"
```

Social Media Avatar

For circular avatar crops on social media platforms, place the logomark on a navy (#1B2A4A) circular background with a 2px gold (#E8A020) border. Center the shield within the circle, leaving approximately 15% padding on all sides.

Circular crop for Instagram, LinkedIn, X, Facebook

Print Usage

Specifications for letterhead, reports, one-pagers, business cards, and signage.

File Formats for Print

CONTEXT	FORMAT	RECOMMENDED SIZE	NOTES
Letterhead	EPS / PDF (vector)	1.5–2" wide	Full or simple lockup; place in upper left with gold rule below
Business card	EPS / PDF (vector)	1.2" wide (front)	Simple lockup on front; full contact on reverse
Report cover	EPS / PDF (vector)	2–3" wide	Full lockup on navy background; position in upper third
One-pager / handout	EPS / PDF (vector)	1.5" wide	Simple lockup in header; navy footer bar at bottom of page
Banner / signage	EPS / PDF (vector)	Scale to context	Use full lockup; maintain proportions and clear space
Merchandise	EPS / PDF (vector)	Scale to context	Logomark only or simple lockup; ensure minimum size compliance

CMYK Color Values

For professional printing, convert all logo colors to CMYK. Request a proof before final print runs to verify color accuracy.

COLOR	HEX (SCREEN)	CMYK (PRINT)	PANTONE (SPOT)
Navy	#1B2A4A	C:90 M:72 Y:36 K:42	PMS 289 C
Gold	#E8A020	C:0 M:36 Y:88 K:4	PMS 7409 C
☐ White	#FFFFFF	C:0 M:0 Y:0 K:0	N/A

Letterhead Placement

On standard letter-size (8.5" × 11") documents, position the logo lockup in the upper-left corner with 0.75" margins. Place a 2px gold rule (#E8A020) spanning the full width of the text area below the logo, with 12pt spacing between the logo and the rule. The navy footer bar appears at the bottom of every page.

Business Card Layout

Standard 3.5" × 2" business cards use a navy front with the white/gold logo centered, and a white reverse with contact information. The gold rule separates the name from the contact details.

File Inventory & Delivery

Complete list of logo files and their intended applications.

Delivered Files

FILENAME	FORMAT	VERSION	USE
GJLA_Logo_Icon_White.svg	SVG	Navy shield on white	Web, digital, light backgrounds
GJLA_Logo_Icon_Navy.svg	SVG	White shield on navy	Web, digital, dark backgrounds
GJLA_Logo_Icon_Transparent_Navy.svg	SVG	Navy shield, no background	Overlays on light images/fields
GJLA_Logo_Icon_Transparent_White.svg	SVG	White shield, no background	Overlays on dark images/fields
GJLA_Logo_Lockup_White.svg	SVG	Full lockup on white	Formal materials, public-facing
GJLA_Logo_Lockup_Navy.svg	SVG	Full lockup on navy	Formal materials, dark backgrounds
GJLA_Logo_Simple_Lockup_White.svg	SVG	Simple lockup with tagline on white	Internal docs, slides, social media
GJLA_Logo_Simple_Lockup_Navy.svg	SVG	Simple lockup with tagline on navy	Internal docs, slides, dark bg

Generating Additional Formats

The SVG source files are resolution-independent and serve as the master files for all derivative formats. To generate PNG, JPG, EPS, or PDF versions, open the SVG in a vector editing application (Adobe Illustrator, Figma, Affinity Designer, or Inkscape) and export at the required dimensions and format. For raster exports, use a minimum resolution of 300 DPI for print and 144 DPI (2x) for retina screen display.

Font Conversion for Universal Compatibility

The lockup SVGs reference Georgia and Calibri system fonts. Before distributing logo files to external partners, convert the text to outlines (paths) in a vector editor. This ensures the wordmark renders correctly on any system regardless of installed fonts.

Co-Branding with Gender Justice League

When GJLA and GJL logos appear together — on coalition materials, joint communications, or shared event branding — they must remain clearly separated. Per Section 7 of the GJLA Brand & Style Guide:

✓ Do

Give each logo its own clearly labeled panel. Use distinct accent colors (gold for GJLA, teal for GJL). Include the legally independent callout text. Maintain equal visual weight between the two marks.

✗ Don't

Never create a combined or blended logo. Never imply that one organization controls the other. Never use GJL branding on GJLA electoral or lobbying materials.

Standard co-branding text: "Gender Justice League Action is a 501(c)(4) social welfare organization. It is a sister organization to Gender Justice League, a 501(c)(3) charitable organization. The two entities share a common mission but are legally and financially independent."

Gender Justice League Action
