SECTION 1

Brand Overview & Mission

Who we are, what we do, and the identity that communicates it.

Mission

Gender Justice League Action advances the civil rights, human rights, dignity, safety, and full civic participation of Two-Spirit, transgender, nonbinary, and gender-diverse people, and women, through legislative advocacy, ballot measure campaigns, public education, community organizing, and electoral engagement.

Organization Profile

Legal Name	Gender Justice League Action
Abbreviation	GJLA (internal / shorthand only — use full name in public-facing materials on first reference)
Tax Status	501(c)(4) Social Welfare Organization
Founded	2026
Location	1416 NW 46th Street, Suite 105-104, Seattle, WA 98107
Sister Organization	Gender Justice League — 501(c)(3), founded 2012

Brand Personality

Authoritative

We speak with the confidence that comes from deep legal knowledge and lived-experience expertise. We know the law, and we know our community.

Warm & Human

Civil rights work is about people. Our communications center humanity, dignity, and the lived experiences of the communities we serve.

Action-Oriented

We exist to win. Our language is forward-leaning, practical, and focused on outcomes — not abstract aspiration.

Disciplined

As a 501(c)(4), legal precision matters. Our brand reflects the organizational rigor we bring to compliance, governance, and financial stewardship.

SECTION 2

Color Palette

A navy-dominant palette with gold and teal accents that conveys authority, warmth, and civic purpose.

Primary Colors

Navy dominates the visual identity at approximately 60–65% of total visual weight. Gold is the primary action and highlight color. These two colors together form the core brand signature.

PRIMARY	SECONDARY	ACCENT
Navy #1B2A4A Dominant background, headers, text on light backgrounds	Navy Mid #243560 Secondary panels, callout boxes, layered navy elements	Gold #E8A020 CTAs, highlights, accent bars, eyebrow text, links

Secondary & Utility Colors

LIGHT	PROGRAM	LIGHT	ALERT
Gold Light #F5C153 Secondary accents, italic notes on dark backgrounds	Teal #1D7A6E Program cards, IRS classifications, "permitted" rules	Teal Light #2A9E90 Hover states, secondary teal accents	Alert Red #C0392B Restrictions, prohibited rules, legal warnings only

Neutral Colors

BG	BORDER	MUTED	TEXT
Off-White #F5F4F0 Page backgrounds, card fills, content sections	Light Gray #E5E7EB Borders, table rules, dividers, alternate row fills	Mid Gray #6B7280 Captions, source notes, secondary labels	Dark Gray #2D2D2D Primary body text on light backgrounds

Color Usage Rules

✓ Do	✗ Don't
Use navy as the dominant background for title slides, section headers, and key messaging. Pair white or gold text on navy backgrounds. Use gold sparingly as an accent — it should draw the eye, not overwhelm. Use teal to distinguish program areas from organizational/governance content. Use red only for legal restrictions and "not permitted" content.	Don't use gold as a background color for large areas (except small callout strips). Don't pair teal text on navy — insufficient contrast. Don't use red for emphasis or highlighting — it's reserved for legal warnings only. Don't use pure black (#000000) — always use Dark Gray (#2D2D2D) or Navy for text. Don't use colors at less than WCAG AA contrast ratios.

SECTION 3

Typography

A two-font system: Georgia for authority, Calibri for clarity.

Primary Typefaces

The GJLA type system uses exactly two font families. Georgia (serif) provides gravitas and institutional authority for headlines and display text. Calibri (sans-serif) provides clean readability for body copy, labels, and UI elements. Both fonts are system-standard and universally available.

Georgia — Display & Headlines

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz 0123456789

Used for: slide titles, section headers, card titles, stat numbers, pull quotes, the organization name in display contexts.

Calibri — Body & Interface

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz 0123456789

Used for: body text, bullet points, eyebrow labels, captions, footers, buttons, form fields, all UI text.

Type Scale

Element	Font	Size	Weight	Color
Slide title (dark bg)	Georgia	36–48pt	Bold	White or Gold
Slide title (light bg)	Georgia	28–32pt	Bold	Navy
Section eyebrow	Calibri	10–11pt	Bold	Gold, charSpacing: 3–4
Card title	Georgia	14–16pt	Bold	Navy
Body text	Calibri	13–16pt	Regular	Dark Gray or White
Stat / big number	Georgia	40–52pt	Bold	Navy or Gold
Caption / source	Calibri	9–11pt	Regular italic	Mid Gray
Footer	Calibri	9pt	Regular	Off-White on Navy

Eyebrow Labels

Eyebrows are small all-caps labels placed above headlines to provide category context. They are a signature element of the GJLA visual identity.

CONTEXT

The Civil Rights Landscape Has Changed.

Eyebrows are always: Calibri, bold, uppercase, gold (#E8A020), letter-spacing 3–4px. Placed 6–

10px above the headline they introduce.

SECTION 4

Visual Motifs & Layout Patterns

Repeating visual elements that create consistency across all GJLA materials.

Left-Edge Accent Bars

The signature GJLA visual element is a narrow vertical color bar on the left edge of content cards, panels, and page elements. These bars are 4–5px wide in digital and print materials, and communicate category through color.

Gold Accent

Organizational information, governance, financial terms, primary brand content

Teal Accent

Program areas, community content, GJL-related materials, charitable activities

Red Accent

Legal restrictions, prohibited actions, compliance warnings only

Top-Edge Accent Bars

Used on numbered program cards and timeline columns. 4–5px wide, placed at the top of the card. Gold for primary/immediate items, teal for secondary, navy-mid for long-term.

01

**Numbered
Program Card**

02

Secondary Item

03

Long-Term Item

Full-Bleed Gold Callout Strip

Used to highlight a single key takeaway. Gold background, navy bold text, full width. One per page maximum.

KEY DISTINCTION: This is the gold callout strip format — for the single

most important point on any given page.

Layout Patterns

Pattern	When to Use	Structure
Full-bleed navy	Title slides, section openers, key messaging	Navy background, white/gold text, gold left-edge bar
Off-white content	Data tables, comparison content, detail pages	Off-white background, navy text, navy footer bar
Sidebar + content	CSA details, category-specific pages	240px navy left panel with label, right side cards
Two-panel comparison	c3 vs c4, GJL vs GJLA, permitted vs not	Equal-width panels, contrasting top bars
Card grid	Program areas, key terms, governance info	2×2 or 3-across, accent bars, shadow
Stat cards	Impact numbers, context statistics	Gold left bar, large Georgia number, descriptive label

Things to Avoid

- No underlines beneath headlines — use whitespace for separation
- No rounded corners on accent bars (use square rectangles)
- No gradients — use flat, solid color fills
- No stock photography — use shapes, text, and color to create visual interest
- No more than one gold callout strip per page/slide
- Never place teal text on a navy background — insufficient contrast

SECTION 5

Voice & Tone

How we sound — across every context, audience, and channel.

Core Voice Principles

GJLA's voice is the voice of a civil rights organization with legal authority and human heart. We are never cold or bureaucratic, but we are always precise. We are never sentimental, but we are always human. We build power — and our language reflects that.

We lead with action, not abstraction

✓ Write this

"GJLA lobbies the Washington State Legislature directly on bills affecting transgender rights — with no limits on how much we can advocate."

✗ Not this

"GJLA is committed to engaging in advocacy activities that promote the social welfare of communities through legislative engagement processes."

We name what we're up against

✓ Write this

"Since 2020, more than 500 anti-transgender bills have been introduced in state legislatures across the country."

✗ Not this

"The current landscape presents challenges for LGBTQ+ communities."

We center community, not the organization

✓ Write this

"Our community deserves every tool available under the law to protect and advance our rights."

✗ Not this

"Gender Justice League Action is a leading organization providing comprehensive services."

Tone by Context

Context	Tone	Example
Board materials	Authoritative, precise, governance-focused	"The Board shall annually review the activity mix to verify social welfare remains the primary purpose."
Donor communications	Warm, urgent, outcome-oriented	"Your support funds the advocacy our community needs — and that our 501(c)(3) cannot legally do."
Legislative advocacy	Confident, fact-based, policy-fluent	"This bill would eliminate protections that have been in force since 2006."
Community-facing	Inclusive, empowering, human	"Trans Advocacy Day is your day to meet your legislators and tell them what matters to you."
Legal / compliance	Precise, specific, no hedging	"All transfers must be at fair market value. No subsidies. No gifts."

SECTION 6

Terminology & Legal Language

Precision matters — both for our community and our compliance.

Organization Names

Use	Format	Context
First reference (public)	Gender Justice League Action	Always use the full name on first reference in any document, page, or communication
Subsequent references	Gender Justice League Action, GJLA, or "the Organization"	GJLA is acceptable after first full reference; "the Organization" in legal documents
Sister organization	Gender Justice League	Always use full name on first reference; GJL acceptable after
Never use	"Gender Justice" alone	Ambiguous — could refer to either entity. Always specify which organization

Tax Status Language

For GJLA (c4):

"Gender Justice League Action is a 501(c)(4) social welfare organization. Contributions to GJLA are NOT tax-deductible for federal income tax purposes."

For GJL (c3):

"Gender Justice League is a 501(c)(3) charitable organization. Contributions to GJL are tax-deductible for federal income tax purposes."

Tax status language must appear in donor solicitations and should appear in organizational descriptions. The phrasing above is legally reviewed — use it verbatim.

Community Language

Preferred Term	Notes
Two-Spirit, transgender, nonbinary, and gender-diverse people, and women	Full community description — use in mission statements, formal contexts, and first references
Transgender and gender-diverse people	Acceptable shorter form for body text after full description has appeared
Our community / our communities	Appropriate in community-facing and advocacy contexts
Gender-affirming healthcare	Standard term — never "gender-reassignment" or "sex-change"
Civil rights protections	Frame legal protections as civil rights, not "special rights" or "privileges"

Legal Terms That Must Be Used Precisely

- **Fair market value (FMV)** — must accompany every reference to resource-sharing between GJL and GJLA
- **Social welfare** — GJLA's primary purpose; never "charitable" (that's c3 language)
- **Electoral activity** — only candidate endorsements; ballot measures are social welfare activity
- **Independent expenditures** — GJLA's endorsements are independent, never coordinated with candidates
- **Cost-Sharing Agreement** — always capitalized when referring to the specific GJL/GJLA agreement
- **Primary purpose** — social welfare must remain GJLA's primary purpose at all times

SECTION 7

Relationship to Gender Justice League

How the two brands coexist — visually and communicatively.

Brand Distinction

GJLA and GJL are sister organizations with a shared mission but separate legal identities. Their visual brands must be clearly distinguishable in all materials. When both organizations appear together, consistent visual cues differentiate them.

Element	GJLA (c4)	GJL (c3)
Top accent bar color	Teal (#1D7A6E)	Gold (#E8A020)
Type badge color	Gold	Teal
Label format	GENDER JUSTICE ACTION FUND	GENDER JUSTICE LEAGUE
Tag line	501(c)(4) Social Welfare Organization	501(c)(3) Charitable Organization

Co-Branding Rules

✓ Do

Always identify which organization is the sender of any communication. Use distinct accent colors (gold/teal swap) to visually separate the two entities. In side-by-side presentations, give each organization its own clearly labeled panel. Include the "IMPORTANT: legally independent" callout in any material that presents both organizations together.

✗ Don't

Never use a combined or blended logo. Never imply that one organization controls the other. Never send a communication where it's ambiguous which entity is the source. Never use GJL branding on GJLA electoral or lobbying materials. Never refer to GJLA as a "project of" or "program of" GJL.

Key Phrases for Describing the Relationship

Standard description:

"Gender Justice League Action is a 501(c)(4) social welfare organization. It is a sister organization to Gender Justice League, a 501(c)(3) charitable organization. The two entities share a common mission but are legally and financially independent, each governed by its own board of directors."

Short form:

"Gender Justice League Action is the 501(c)(4) advocacy arm of the Gender Justice movement — independent from, and complementary to, Gender Justice League's 501(c)(3) charitable work."

SECTION 8

Application Examples

How the brand system comes together in practice.

Presentation Slides

Slide decks use a 16:9 aspect ratio. Title and section slides use navy full-bleed backgrounds with gold left-edge accent bars. Content slides use off-white backgrounds. Every slide except the title slide includes a navy footer bar with "Gender Justice League Action · [Context] · [Date]" in 9pt off-white Calibri.

Print Documents

Print documents (handouts, reports, one-pagers) use letter-size format with 0.7–0.8" margins. Navy section headers span full width with a 6px gold left bar. Content sections use off-white card backgrounds for visual grouping. Navy footers appear at the bottom of every page.

Digital Communications

Emails and digital content follow the same color system. Navy serves as the header/footer color. Gold is used for CTAs and links. Body text is Dark Gray (#2D2D2D) on white or off-white backgrounds. The organization's full name appears in every email header and footer.

Data Tables

Tables use navy header rows with white bold text, alternating white/off-white row fills, light gray borders, and teal for classification or category columns. Left columns are bold. Source citations appear below in italic Mid Gray.

Slide Footer Format

Format: "[Organization Name] · [Document/Event Name] · [Month Year]" — 9pt Calibri, Off-White, vertically centered in a 28px navy bar.

SECTION 9

Quick Reference for AI Assistants

Copy-paste ready values for use with Claude, ChatGPT, or other AI design tools.

When prompting an AI assistant to create GJLA-branded materials, include the following specification block. This gives the model everything it needs to produce on-brand output.

```
/* GJLA Brand System — AI Prompt Reference */
```

COLORS:

```
Navy (primary bg):      #1B2A4A
Navy Mid (secondary):   #243560
Gold (accent/CTA):      #E8A020
Gold Light:             #F5C153
Teal (programs):        #1D7A6E
Teal Light:             #2A9E90
Off-White (content bg): #F5F4F0
Dark Gray (body text):  #2D2D2D
Mid Gray (captions):    #6B7280
Light Gray (borders):   #E5E7EB
Alert Red (warnings):   #C0392B
```

FONTS:

```
Headlines/display: Georgia (serif), bold
Body/UI text:      Calibri (sans-serif), regular
Eyebrow labels:    Calibri, bold, uppercase,
                   gold, letter-spacing 3-4px
```

VISUAL MOTIFS:

- Left-edge accent bars (4-5px):
Gold = org/governance, Teal = programs,
Red = restrictions only
- Top-edge accent bars on numbered cards
- Full-width gold callout strip (1 per page max)
- Navy footer bar on every page/slide
- No underlines, no gradients, no stock photos

- No rounded corners on accent bars

LAYOUT (slides):

16:9 ratio (960×540 or 1920×1080)

Dark slides: navy bg, white/gold text

Light slides: off-white bg, navy/dark gray text

Footer: 28px navy bar, 9pt off-white Calibri

VOICE:

Authoritative, warm, action-oriented, precise.

Lead with action, name the threat, center

community. Never bureaucratic, never vague.

ORG NAME:

Full: "Gender Justice League Action"

Short: "GJLA" (after first full reference)

Tax: "501(c)(4) social welfare organization"

Sister: "Gender Justice League" / "GJL"

Never: "Gender Justice" alone (ambiguous)

Tip for AI prompts: Paste the code block above at the start of your prompt, then describe what you need. Example: "Using the GJLA brand system above, create a one-page donor appeal flyer with a stat card, two program highlights, and a CTA."

PptxGenJS-Specific Notes

When generating PowerPoint files programmatically with PptxGenJS:

- Never use # prefix on hex colors — PptxGenJS corrupts files if you do. Use "1B2A4A" not "#1B2A4A"
- Never reuse shadow objects — PptxGenJS mutates them in-place. Use a factory function: makeShadow()
- Use bullet: true for bullet points — never Unicode • characters
- Use breakLine: true between items in rich text arrays
- Shadow offset must be non-negative — use angle: 270 for upward shadows
- 8-character hex colors (with alpha) corrupt files — opacity goes in the opacity

property only

- Keep all content above y:5.35 to avoid colliding with the footer bar (y:5.35–5.625)
